# Where we exist in the SPREP Strategic Plan 2017 - 2026

**T**he future directions outlined in this Strategic Plan will require the SPREP Secretariat to strengthen and realign its institutional capacities, competencies, and systems to best support Members by delivering more integrated, responsive, and cost-effective services to Members and partners and by better coordinating regional efforts.

The need for sustainable funding continues to be a key challenge that requires immediate focus. SPREP will embrace new and bold approaches to other significant challenges including structural reorganisation, capability building, and ongoing change management to capitalise on new opportunities

and maximise available resources. Over the next ten years, we will adapt, respond, and develop to ensure the trust and confidence of our Members, partners, and stakeholders.

## **ORGANISATIONAL GOAL 1:**

SPREP has information, knowledge, and communications systems that get the right information to the right people at the right time and influence positive organisational, behavioural and environmental change.

The role of the Secretariat as a clearing-house of information and knowledge is fundamental to ensuring that essential technical, scientific information, and traditional knowledge is available to our Members when needed.

Effective SPREP external

communications and advocacy is vital in protecting and sustainably managing Pacific environments and in forming and maintaining relationships with current and potential new Partners.

## **OBJECTIVES**

- 1.1** Share and use knowledge through the development and maintenance of reliable systems and processes for the effective collection, storage, and access to critical information.
- 1.2** Influence positive behaviour change within SPREP and its stakeholders through persuasive, purposeful, and integrated communications.
- 1.3** Improve quality and interoperability of information and communications technology infrastructure in the region.
