

KO MAREVA E TE MOANA!

The Pacific BioScapes Programme is a European Union (EU) funded action, managed and implemented by the Secretariat of the Pacific Regional Environment Programme (SPREP). The Programme contributes to the sustainable development of Pacific Small Island Developing States through the implementation of 30 focused activities taking place across a diversity of ecosystems in 11 countries that will address critical issues concerning coastal and marine biodiversity, and ecosystem-based responses to climate change adaptation.

For more information, please visit: www.sprep.org/bioscapes

Marine Spatial Planning (MSP) is a process to spatially organise how people use the ocean to minimise user-conflict and maintain ecosystem health. This comic book aims to assist communities to understand their role in the planning process. It has been written and illustrated by Carlo Iacovino with the support of SPREP and IUCN and features the 10-step planning process developed under the MACBIO project.

This version in Cook Islands Maori has been facilitated by the Te Koutu Mana Tutara O Te Ipukarea - Marae Moana Coordination Office.

Join Mareva and her community as they learn about marine spatial planning in the Pacific. In this story they witness a ship running aground and damaging their local reef. Then they become motivated to speak up about protecting their island and the ocean around it!
