

Faith and recycling unite as Circular Pacific Plastics Phase 2 launches in Fiji

Pacific Recycling Foundation marked a significant milestone in Fiji's recycling journey with the successful launch of Phase 2 of the Circular Pacific Plastics (CPP) Project at Saint Pius X Parish Raiwaqa, bringing structured plastic recovery and recycling education into a faith-based setting for the first time. The launch, officiated by the Head of the Catholic Church in Fiji, Archbishop Peter Loy Chong, signals a new and important direction for recycling advocacy in Fiji - one that recognises the influential role of faith-based institutions in shaping values, behaviours, and community responsibility.

Bula!

This year is shaping up to be a big one for the region and we continue to strengthen our collaboration with our partners to support our Members. With 2025 recorded as one of the warmest years on record, the need for enhanced climate science services and environmental resilience has never been more urgent. Our team have been actively engaged in supporting capacity building in the use of Traditional Knowledge for weather forecasting, advancing climate resilience through practical invasive species management, and delivering training on marine litter. With a full calendar ahead, your Secretariat stands ready to support the region on our shared mission for a Resilient Pacific.

From Mr Sefanaia Nawadra, Director General of SPREP

Tonga's newly appointed Prime Minister takes on Champion Role for Weather Ready Pacific Programme

The Weather Ready Pacific (WRP) programme has received a major boost with Tonga's newly appointed Prime Minister, Lord Fakafanua, graciously accepting the role of championing the Weather Ready Pacific Programme. Confirmed during his recent meeting with the Director General of SPREP, this marks a significant milestone for regional efforts to strengthen weather and climate resilience across the Pacific.

Protecting dolphins and whales in our Pacific

Traditional knowledge, science, storytelling and innovation converged in Fiji as Pacific nations and global partners gathered to strengthen collaborative conservation efforts for whales and dolphins across the Western Pacific. A Pacific partnership between the International Whaling Commission (IWC), the Secretariat of the Pacific Regional Environment Programme (SPREP) and WWF resulted in a series of three workshops to help save our Pacific whales and dolphins.

'Those graveyards, burial and historical sites represent our history, who we are'

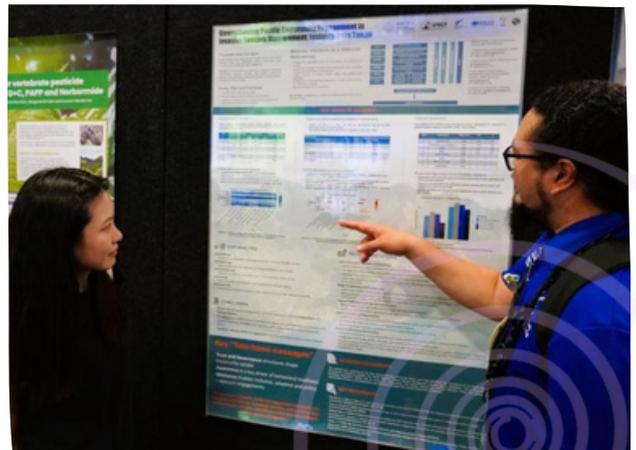

Vanuatu, like all Pacific island countries, is highly vulnerable to the impacts of climate change. The World Risk Index consistently ranks the collection of 83 islands near the Pacific "Ring of Fire", an area of strong volcanic activity and earthquakes, and close to the centre of the cyclone belt, as the world's most vulnerable country to climate risks and disasters.

Enhancing Biosecurity through Inclusive Engagement: Evidence from the Vātalanoa Approach in Tonga

Invasive species are a major threat to Pacific islands, yet technical solutions alone are insufficient without community trust, inclusion and culturally grounded engagement. Drawing on new evidence from Vava'u, Tonga, a recent research traces a clear line between culturally grounded engagement and sustained biosecurity action in Pacific island communities.
