

# Mainstreaming

Nauru PACC

# Issues

- ▶ Rainfall highly varied
  - ▶ On Average, every 5.2 Years, expected on average drought period of 19months
  - ▶ Insufficient Storage Capacity for Potable Water
  - ▶ Limited access to other sources of water
  - ▶ First Priority strategy listed under water and sanitation sector in 2005–25 NSDS (revised 2009)
- 

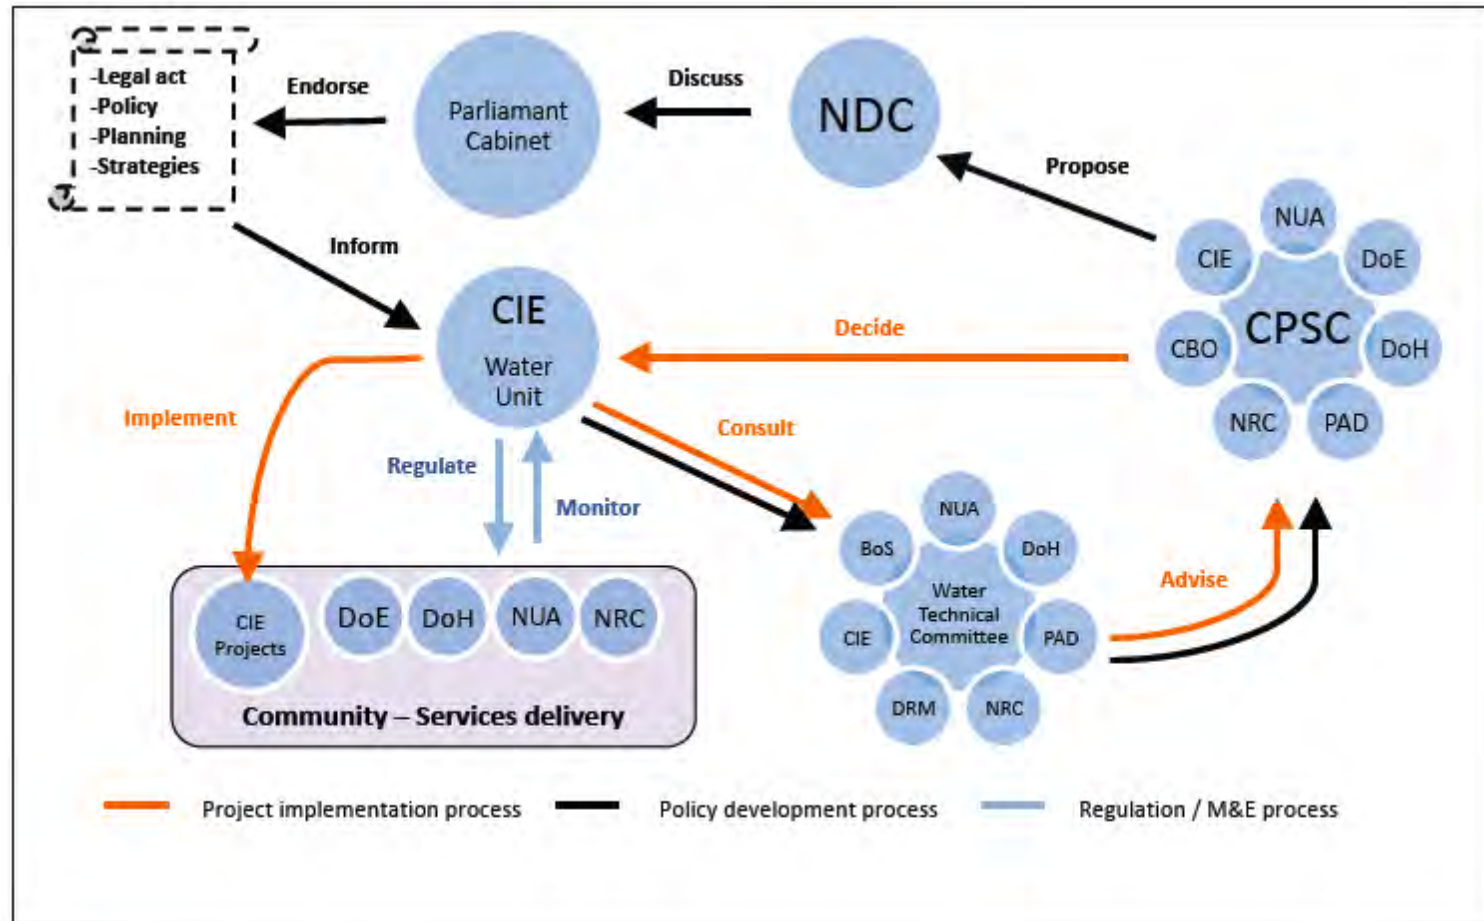

# Issues

- ▶ “Develop a National Water Resource Management policy to guide the sustainable use and management of water resources in Nauru”
  - ▶ Lack Of Coordination – Blurred and overlapping responsibilities have resulted in tasks falling between the cracks and not being coordinated across sectors.
- 

# Mainstreaming Efforts

- ▶ Development of the Committees
  - Technical Committee (All relevant water Sectors)
  - CIE Projects Steering Committee

# Mainstreaming Process
