

Climate Change

What does it mean for me and my community?

The Pacific Adaptation to Climate Change program works to assist communities build resilience to the effects of Climate Change.

How is climate change affecting the planet and our country?

One of the results of climate change is more extreme and frequent weather events such as storms and droughts. Here in Nauru, a country that already is facing water woes, this is bad news and something that needs to be prepared for.

What is the PACC doing?

The PACC group is working with its partners to help Nauru communities learn resilience to climate change, most importantly in the area of water conservation. This means no matter what happens to our country in a year of changing climate patterns, you know you have your own supply of clean safe drinking water.

How are we doing this?

Currently the major source of water in Nauru is desalination. However the plant can not keep up with the amount of water needed in Nauru. It is important to look at alternative sources of water.

What is portable water and how is it more desirable?

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Fusce fringilla consectetur consectetur. In pulvinar erat et nisi fermentum at fringilla arcu tincidunt. Proin interdum egestas tellus sed malesuada.

How can I get in touch with the PACC about working with my community?

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Fusce fringilla consectetur consectetur. In pulvinar erat et nisi fermentum at fringilla arcu tincidunt. Proin interdum egestas tellus sed malesuada.
