

Pacific Adaptation to Climate Change **(PACC)** Project

for

Kivori Villages

PNG

Kivori Poe Village

Unsafe road conditions contribute to vulnerability

Education is a challenge in the Kivori community as children have to walk for hours to reach school

Sports can keep youths away from trouble but
no proper facilities available

Cooperatives - failure to form cooperatives

Kivori communities suffer a double banger – flooding at one extreme and drought on the other.

Drought

Pests destroy food / cash crops and contribute to insecurity

Health

- shortage/no medicine; no ambulance; increase number of deaths

Hereparu Village

Road Conditions very difficult contributing to community vulnerability.

Efforts had been made to supply quality drinking water to the people of Kivori Hereparu

People on well water but also have pit toilets nearby.

Kivori is always hit by droughts 6 months of the year

Metal posts corroding when in contact with sand

Meauri Village

An estimated 10m beach erosion per year - next 10 to 15 yrs the village of Meauri will need to relocate

Into the grassy knoll to access the last
Kivori village - Meauri

Medical Services

- lack of health services

Education

Water

- shortage during dry seasons

Sports

- no sponsor / sporting facilities

Kivori Kui Village

Agriculture the main source of livelihood for Kivori

School Infrastructure.....

People depend on Private Motor Vehicles (PMVs) for transportation need

Failed projects in the past

- Cooperatives (LLG); Water Project (LLG,EEC); Rice Project (DPI); Wind Power

Law and Order

- increase in criminal activities; need to strengthen village court system

Sports

- to involve youths as to counter the abuse of drugs and alcohols

Health

- no medical officer; no hospital; no ambulance

...END...
